JOB REFERENCE

Miss Elizaveta Ragozina, born on 09/10/1993, worked as a research assistant from 04/01/2019 – 09/31/2019 at TU Dresden, Faculty of Computer Science, Chair of Human-Computer Interaction, led by Professor Gerhard Weber. The working volume covered 6 hours weekly.

The Chair of Human-Computer Interaction teaches and researches the user-friendly and accessible interaction, design and implementation of information systems. Special research focuses on usability design and accessibility for different user groups.

In this context, the employment of Ms. Ragozina was embedded in a current project to develop a barrier-free museum guide in cooperation with the Dresden State Art Collections. Within this project, Ms. Ragozina was involved in the conception and implementation of a mobile museum guide for different target groups with various requirements (blind users, deaf users, cognitively impaired users).

Ms. Ragozina's tasks included the conception and design of a graphical user interface for the mobile museum guide, which is being implemented for the exhibition "Old Masters". Apart from that, she was involved in the conception of the interaction design as well as in the individualization of the guide for the needs of different user groups. Furthermore, Ms. Ragozina developed the underlying database schema and created the database with SQL-Lite. Ms. Ragozina implemented the basic structure and essential functions of the museum guide in Java as an Android application. The version control of the project was realized with Git.

Beyond that, Ms. Ragozina master's thesis on a scientific level deals with the implementation of an orientation function for blind people in a museum.

Within the scope of her work, Ms. Ragozina has been extraordinarily involved in the project. She showed an exceptional degree of independence, creativity and always took responsibility for the tasks assigned to her.

She always completed tasks efficiently and to our complete satisfaction. When dealing with colleagues, Ms. Ragozina showed outstanding teamwork and social commitment. She was highly appreciated by all project participants on a personal and professional level.

We would like to thank Ms. Ragozina for her excellent commitment in her work as a research assistant at our professorship and wish her continued success.

Best regards

Christin Engel, M.Sc.

Letter of Recommendation

Elizaveta Ragozina, Date of Birth: 10.09.1993, is a student of Computer Science Master Student at Technische Universität Dresden. I met her when she acted voluntarily as Erasmus+ CBHE Project Assistant to support our proposal to the ERASMUS+ Program Capacity Building in Higher Education. The corresponding course P11 took place from Oct 2018 to Feb 2019.

The project "Sanctuary University. Awareness, Interest, Desire, Action (SU-AIDA)" promotes the inclusion and welfare of refugees, asylum seekers and vulnerable migrants within the setting of universities of Dublin (Ireland), Yerevan (Armenia) and Amman, (Jordan). The project application addresses the topics of new technologies, digital competences as a relevant matter for the integration of refugees and is dedicated to the social responsibility of educational institutions.

Mr. Ragozina's contribution to the preparation of the proposal included the following parts:

- Active participation in weekly meetings
- Research database to sustain arguments for the specific aspects of the proposal
- Preparing data-based and textual parts for the application form

While contributing to the project, Ms. Ragozina demonstrated social commitment, open-mindedness and was all the time a responsible, courteous and reliable colleague.

We are very grateful that Ms. Ragozina contributed to the project and recommend her with emphasis.

We wish her all the best for her future career.

Sincerely,

Evaluation

During the summer term 2019, Mrs. Elizaveta Ragozina, born on 10 September 1993, worked as a student assistant for the “Media psychology and media didactics” course at the faculty for computer science at the institute for software- and multimedia technology.

In the scope of her work she assisted the professorship for didactics of computer science with her tutoring activities within her training as a media computer scientist.

Mrs. Ragozina supervised the students as they created their project work which was part of the course “Media psychology and media didactics”. Her tasks consisted of:

- Weekly meetings with the project groups:
Supervision of the individual groups, distribution of tasks, assistance with the implementation of the educational games, problem solving within the groups
- Meetings with other tutors:
Presentation of the current state of the project, revision of the sub goal fulfillment

Mrs. Ragozina carries out her tasks with a strong sense of responsibility and a very strong commitment.

Towards her students she always maintained a kind and competent appearance. Mrs. Ragozina works motivated, reliable, and thoughtful, and understood how to carry out the tasks given to her to our complete satisfaction. We wish her all the best for her future career and private life.
